

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 29, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity:	Light (53) new fires
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	16
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Nationally, there are 48 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Great Basin Area (PL 3)

New fires:	10
New large incidents:	0
Uncontained large fires:	6
Type 1 IMT's committed:	2
Type 2 IMT's committed:	2

Roosevelt, Bridger-Teton NF. IMT 1 (Demasters). Thirty-two miles south of Jackson, WY. Timber and brush. Active fire behavior with group torching, spotting and crowning. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Pole Creek, Uinta-Wasatch-Cache NF. IMT 1 (McGowan). IMT is also managing the Bald Mountain incident. Twelve miles northeast of Nephi, UT. Timber. Active fire behavior with isolated torching, long-range spotting and smoldering. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Bald Mountain, Uinta-Wasatch-Cache NF. Seven miles northeast of Mona, UT. Timber and brush. Active fire behavior with wind-driven runs, group torching and short-range spotting. Numerous residences and transportation and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Prospect, Salmon-Challis NF. Thirty-one miles northwest of Stanley, ID. Timber and tall grass. Extreme fire behavior with uphill runs, crowning and long-range spotting. Structures threatened. Road, area and trail closures in effect. Last narrative report unless significant activity occurs.

Mirror Lake Complex (2 fires), Uinta-Wasatch-Cache NF. IMT 2 (Roide). Thirteen miles east of Kamas, UT. Timber, brush and light logging slash. Active fire behavior with short-range spotting, uphill runs and torching. Structures threatened. Road, area and trail closures in effect.

Marten Creek, Bridger-Teton NF. IMT 2 (Rohrer). Thirteen miles east of Afton, WY. Timber and brush. Moderate fire behavior with torching, backing and creeping. Road and area closures in effect.

Predictive Service Discussion: A rapidly weakening low pressure system will move on shore and into northern California and Oregon, bringing widespread showers to both states. To the southeast of this system, a breezy southwesterly flow will be present across the Great Basin as the surface pressure gradients strengthen. Temperatures will climb to 10 degrees above average, resulting in very low humidities in the afternoon across the Intermountain West. Active fire behavior is expected across the region on existing fires. Elsewhere, easterly flow will continue across Montana and portions of northeastern Wyoming. In the East, a quiet westerly flow is expected with near average temperatures.

Fuel Handling

Miscellaneous Fireline Hazards

Fuel Handling – Watch Out for “Normalization”

There is an apprehension that the safety concerns surrounding the use of gasoline in firefighting operations can get “normalized”. In firefighting, we use gasoline for a variety of applications, including: pumps, chainsaws, vehicles, drip torches, etc.

“Normalization” of hazards or risks is when we get comfortable around these hazards and take shortcuts without consequence. After a while, we can get so comfortable with these shortcuts that we forget about the original mitigation to reduce the hazard or risk.

1. What do we use gasoline for in our firefighting operations?
2. What risks are associated with our uses of flammable liquids?
3. What mitigations or procedures are in place for handling fuel?
4. What can you do to prevent being sprayed or doused in gasoline from gas tank pressure?
5. What should you do to extinguish someone who is on fire?

Check out [this new RLS from 2017](#) that spotlights

14 instances

of fuel igniting incidents reported in the past

5 years and discusses drip torch burn injuries.

Day of burn injury

5 Days after burn injury

Chainsaw Operators:

Watch this short safety video for information on preventing fuel leakage, identification of potential vapor lock/tank pressurization, mitigation measures for vapor lock/tank pressurization, and reporting procedures for future occurrences: [Chainsaw Safety](#).
